# Chemical Regulatory Updates in Turkey, UK, India & EU

# Chemical Regulatory Updates in Turkey, UK, India & EU

## Presenter

**GAGAN KUMAR**  
Managing Director  
REACHLaw India Pvt. Ltd.  
[gagan.kumar@reachlaw.fi](mailto:gagan.kumar@reachlaw.fi)

# Chemical Regulatory Updates in EU, UK, Turkey & India

## Purpose of the presentation

- The basic knowledge of the Chemical Regulatory Updates in Turkey, UK, India & EU.
  - Turkey REACH: Registration (Co- and Lead), ways to comply and costs
  - UK REACH: Extension of registration deadlines, implications, and benefits of being part of a substance group already now
- India BIS: Updates on new chemical inclusion in 2023/2024
- EU REACH: overview of regulatory updates from 2022-23, what is coming next, enforcement etc

*You may request copy of this presentation from chemexpo*

# AGENDA

- REACHLAW IN BRIEF
- CHEMICAL REGULATORY UPDATES

## OUR FOCUS

UK REACH / EU CLP

TURKEY KKDIK / SEA / GBF

EU REACH / EU CLP

Providing Support for REACH  
and REACH-Like Chemical  
Regulations Globally

KOREA REACH\*\*

INDIA "REACH"<sup>\*</sup>

\* Upon entry into force  
\*\* Through REACHLaw Global Partners

**Established in Helsinki, Finland 2006**

**Offices in five (5) countries**

**Multidisciplinary team - Business, Legal & Technical: Toxicologists, Eco-toxicologists, Chemists, Socio-econ. analysts and Environmental specialists**

**20+ local partners in Europe, Asia, Latin-America & USA Support in  
10+ different languages**

**Major industries served: Oil, Chemicals, Specialty Chemicals, Metals, Aerospace sector, Pulp & Paper and Other downstream users (DU) industries, etc.**

**More info at: [www.reachlaw.fi](http://www.reachlaw.fi)**

# REACH>LAW

COMPLIANCE . SUSTAINABILITY.

**Customers: 900+**

**Continents: 5**

**Countries: 60+**

**Pre-Registrations: 8 000+**

**Co-Registrations: 1 000+**

**Lead Registrant cases: 200+**

**Authorisation Applications: 30+**

**Classification Notifications: 4 000+**

**Global Chemical Notifications: 12 000+**

## SOME STATISTICS

# REACHLAW

COMPLIANCE . SUSTAINABILITY .

Brussels, Belgium

Manchester, UK

Helsinki, Finland (*head office*)

## WORLDWIDE OFFICES

Istanbul, Turkey

New Delhi, India

**REACHLaw India Pvt. Ltd.**  
Unit 431, Fourth Floor, City Centre  
Mall, Sector-12, Dwarka,  
New Delhi -110075. India.

COMPLIANCE . SUSTAINABILITY .

## MARKET ACCESS SERVICES FOR CHEMICAL PRODUCTS AND MORE

- Only or Authorized Representation (EU, UK, Turkey, India\*, South Korea\*\*)
- Pre-Registration/ Notifications / Product Registry Notifications
- Registration (Lead & Co) (EU, UK, Turkey, India\*)
- Authorisation (EU, UK, Turkey\*\*\*)
- SVHC Advocacy & Consultancy
- Outsourcing of Chemicals Regulatory Compliance Functions
- Classification and Labelling
- SCIP Strategy and Notification Services
- Circular Economy Services
- Legal & Technical Services
- Consulting
- Training ...etc

### Regulations Supported:

- EU REACH & CLP
- UK REACH & CLP
- Turkey KKDIK & SEA & GBF
- India REACH\*
- Korea REACH
- Swiss ChemO
- China “REACH” & GHS

...and more

\* Upon Entry Into Force

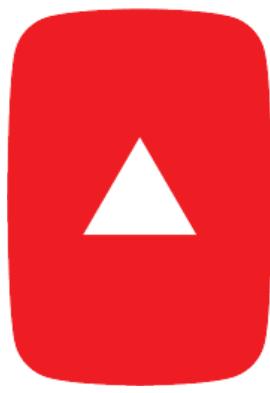

\*\* Through local partner

\*\*\* When obligations enter into force

**REACHLaw is one of the foremost  
Only Representatives in the EU,  
representing several hundred  
non-EU/EEA companies worldwide**

*( North America, South America, non-EU/EEA Europe,  
Asia, Africa, Oceania, Middle East, ... )*

# EU REACH

## Evaluation

### Post Registration additional cost

- The LoA process under EU-REACH is driven by the principle of **cost sharing**.
- **The costs are subject to change due to new study request from ECHA & recalculation.**
- The costs can go up or down resulting in **Refunds** or **Top-ups** (additional invoice)
- There can be **extra costs** due to:
  - **By ECHA or Member states : Evaluation**
    - Substance Evaluation (CoRAP) by EU Member States
    - Compliance Check Evaluation (CCH)
    - Testing Proposal Evaluation (TPE)
  - **By Lead Registrant (LR) or Consortium or Only Representative : Dossier update**
    - Lead dossier update due to evaluation
    - Co-reg dossier update by OR\_CSR,USES, Tonnage quantities.

# Evaluation Decide at Draft Decision

>100 tpa by 2023  
1-100 tpa by 2027

Compliance Check Evaluation (CCH)

Testing Proposal Evaluation (TPE)

Dossier Evaluation (By ECHA)

Substance Evaluation (CoRAP)  
(By EU Member States)

Evaluation

1 You may choose to deactivate your registration (based on your business etc) at this stage. Consequently, you will not receive the adopted/final decision at a later stage.

2 You may choose to downgrade your registration at this stage, provided you have sufficient evidence for your imports in lower tonnage band to EU and ECHA accepts the justification. Consequently, you will not receive the adopted/final decision at a later stage.

Final/Accepted Decision

Draft Decision

12 months

Once the final decision is available, then all the addressees are bound to comply with the requirements of the decision depending on the tonnage band.

Final/Accepted Decision

Draft Decision

12 months

All the addressees are bound to 2 comply irrespective of the tonnage band!!!

1 You may choose to deactivate your registration at this stage.

# Deadlines and changes Recent updates under REACH

## Already in force, Applicable from 14.10.2022

1. Additional test requirements, REACH Annex VI-X are updated **Commission Regulation (EU) 2022/477**
2. ECHA: Only Representative are obliged to provide details of the non-EU manufacturers they represent.
3. Substance identification information including
  - ✓ Nanoforms
  - ✓ UVCBS
  - ✓ clarified requirements for reporting constituents, impurities, and additives as well as for analytical information.

## Already in force

4. Update Member Dossier in 3-6 months **Commission Regulation (EU) 2020/1435**
5. REACH Annex II SDS regulation **Commission Regulation (EU) 2020/878**.
  - ✓ Safety data sheets not complying with the Annex to this Regulation may continue to be provided until 31 December 2022.

# REACH Revision & Enforcement

## Few Major highlights

1. Increased information requirements for low tonnages/most harmful substances, Chemical Safety Assessment & Report also for 1-10 tonnes
2. Registration of polymers
  - ✓ Notification of all polymers
  - ✓ Registration of polymers requiring registration (PRR)
3. Revocation of registration & Evaluation
4. Authorisation and restriction reform to streamline these regulatory tools and reduce the burden on companies and authorities
5. Audit Capacity + provisions for MS's control systems
6. Strengthen automated custom control of registration, safety data sheets
7. **Current Enforcement:** chemical control at customs for restriction & safety data sheet compliance as per Annex II

## REACH revision

Overview and specific questions for consultation

CARACAL-48 (28 March 2023) AP 4.1

REACH LAW

**UK REACH**

# UK REACH Overview

## Some Statistics

- Number of DUIN submissions: ~ 1 000 000  
*(no exact figure officially available)*
  - Number of submitting Legal Entities (GB importers and Only Representatives): >5 000
- Substances notified under the UK REACH Grandfathering process: 4 042
- Some 22 000 different substances have been either DUIN notified or Grandfathering (*Different EU REACH substances registered: 22 244*)
- Inquiries submitted: ca. 5 000 (*Compiled from multiple sources*)
- New Registration of Existing Substances (NRES): ca. 500
- Novel substances registered under the UK REACH:
  - ca. 20 - 50 (*Data from May*)

## UK REACH Overview

### Comparison EU REACH vs. UK REACH

Task / Scope	EU REACH	UK REACH
Pre-registration	No longer possible	No, DULIN applicable for GB based importers of EU REACH registered substances
Inquiry	Yes	All chemicals at ≥1 t/a (exemptions apply). When to register depends on whether substance was on the UK market in 2019 and/or 2020 and the hazards and t/a of the substance. <b>Registration deadlines to be extended by 3 year per deadline</b>
Registration	All chemicals at ≥1 t/a (exemptions apply)	All chemicals at ≥1 t/a (exemptions apply).
Grandfathering	No	Yes, but deadline passed (30.4.2021)
Polymers	Exempted, but not monomers.	Exempted, but not monomers
Data requirement	More volume, more data	More volume, more data. <b>Likely changing for some substances of lesser concern</b>
Joint Registration	Yes	Yes
Only Representative	Yes	Yes
R&D / PPORD Exemptions	Yes	Yes
Product notification	No	No
Safety Data Sheets	Yes	Yes

REACH LAW

## Registration, the Basics

## Registration and Related Deadlines - Current Legal Text

\* POM = Placing on the Market in GB  
\*\* Deadline Extensions pending

Before POM\*

30.4.2021

27.10.2021

### Non-Existing Supply Substances / NRES Substances

Substances that cannot benefit from Transitional timelines at  $\geq 1$  t/a

### Grandfathering notification deadline

Applicable only to GB based EU REACH registration holders

### Downstream User Import Notification (DUIN) deadline (Late DUIN possible)

Applicable to GB importers of substances from the EU/EEA/NI and Only Representatives that will need to UK REACH register substances at 1 t/a or more

### Registration deadline 1

$\geq 1000$  t/a substances  
 $\geq 100$  t/a Very toxic to aquatic organisms (acute or chronic)  
 $\geq 1$  t/a Carcinogenic, Mutagenic, or toxic for Reproduction (CMR) substances  
 $\geq 1$  t/a Candidate list SVHCs as on EU List on 31 December 2020 (transposed to UK)

### Registration deadline 2

100 - 1000 t/a substances  
 $\geq 1$  t/a Candidate list substances (*unless already covered above*) that are on the UK REACH Candidate List as of the 27<sup>th</sup> of October 2023

### Registration deadline 3

1 - 100 t/a substances

27.10.2027/30\*\*

REACH LAW

# Registration Deadline Extensions - Who's Affected & What's Next

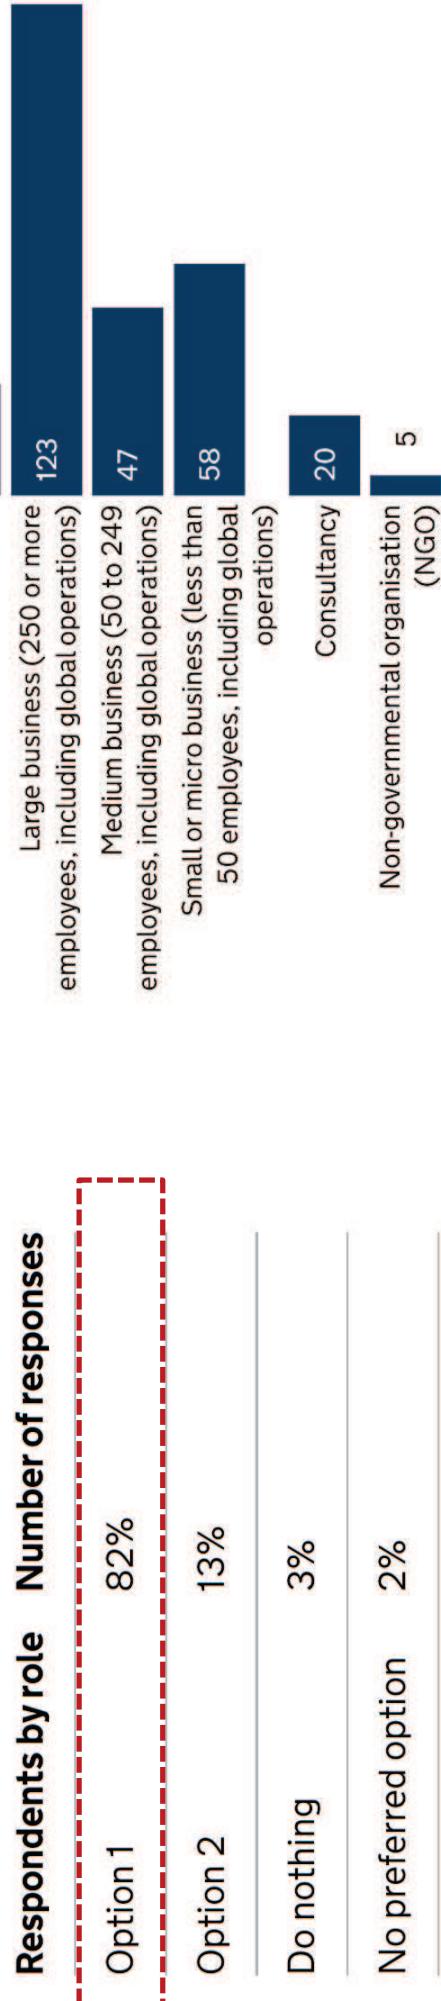

## Background: 3 Options for Extending the Registration Deadlines

Type of Substances	Transitional Registration Deadlines	Option 0 (Current DL)	Option 1 (3:3:3)	Option 2 (3:2:1)
Substances at $\geq 1000$ t/a and CMR substances at $\geq 1$ t/a <u>and</u> substances very toxic to aquatic organisms ( <u>acute or chronic</u> ) at $\geq 100$ t/a <u>and</u> Candidate list substances (as of 31 December 2020) at $\geq 1$ t/a	27 October 2023	27 October 2026 (= Current DL + 3 years)	<del>27 October 2026 (= Current DL + 3 years)</del>	<del>27 October 2027 (= Current DL + 3 years)</del>
Substances at 100 - 1000 t/a <u>and</u> Candidate list substances as of 27 October 2026 at $\geq 1$ t/a		<del>27 October 2025</del>	27 October 2028 (= Current DL + 3 years)	<del>27 October 2027 (= Current DL + 2 years)</del>
Substances at 1 - 100 t/a		27 October 2027 (Do nothing option)		Preferred by the GOV
			<b>Selected</b>	

# Registration Deadline Extensions - Who's Affected & What's Next

## Background: **Option 1 (3:3:3) Selected**

- A total of **289 responses** to the consultation were received
- **Question 8:** What is your preferred option on extending the registration deadlines?

Source: [Defra, Consultation outcome - Summary of responses and government response \(Updated 29 November 2022\)](#)

# Registration Deadline Extensions - Who's Affected & What's Next

## New Transitional Registration Deadlines

Type of Substances	New Transitional Registration Deadlines*
Substances at $\geq 1000$ t/a and CMR substances at $\geq 1$ t/a <u>and</u> substances Very toxic to aquatic organisms ( <i>acute or chronic</i> ) at $\geq 100$ t/a <u>and</u> Candidate list substances ( <i>as of 31 December 2020</i> ) at $\geq 1$ t/a	27 October 2026
Substances at $100 - 1000$ t/a <u>and</u> Candidate list substances as of 27 October 2026 at $\geq 1$ t/a	27 October 2028
Substances at $1 - 100$ t/a	27 October 2030

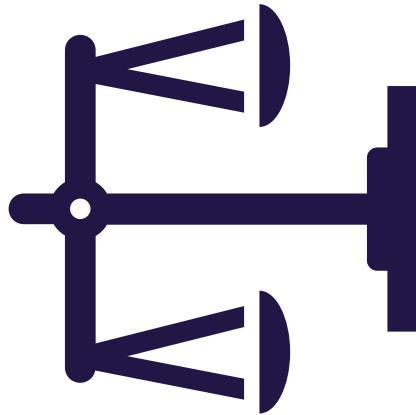

These applies to **Grandfathering**, **DUIN** and **NRES** (*Joining the joint submission part*) only.  
New substances must still be fully registered before placing on the GB market at  $\geq 1$  t/a.

\* Pending legislative updates

# Registration Deadline Extensions - Who's Affected & What's Next

## What's Next

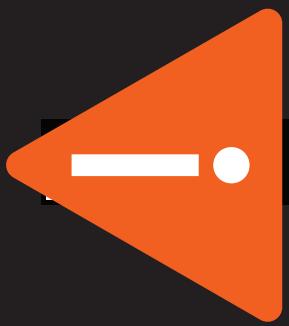

- Registration Deadline Extensions are **expected to become law during summer 2023** (...that's a bit late but better late than never)
  1. Draft Statutory Instrument before Parliament
  2. Debate and vote in both Houses of Parliament
  3. Signed into law by the Secretary of State
  4. Entry into force: **Before 27 October 2023** (...hopefully)
- **Risks:** Potential for legal challenges resulting in delays...?
- If legislation will not be in place by the first registration deadline (27 October 2023), **emergency legislation will be introduced to implement the changes to the registration deadlines (Defra)**

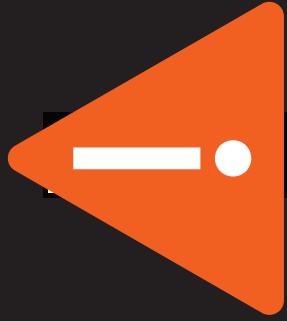

**You will need to follow the  
legislative process for  
introducing the registration  
deadline changes into law**

**Only rejoice once that happens and  
happens on time**

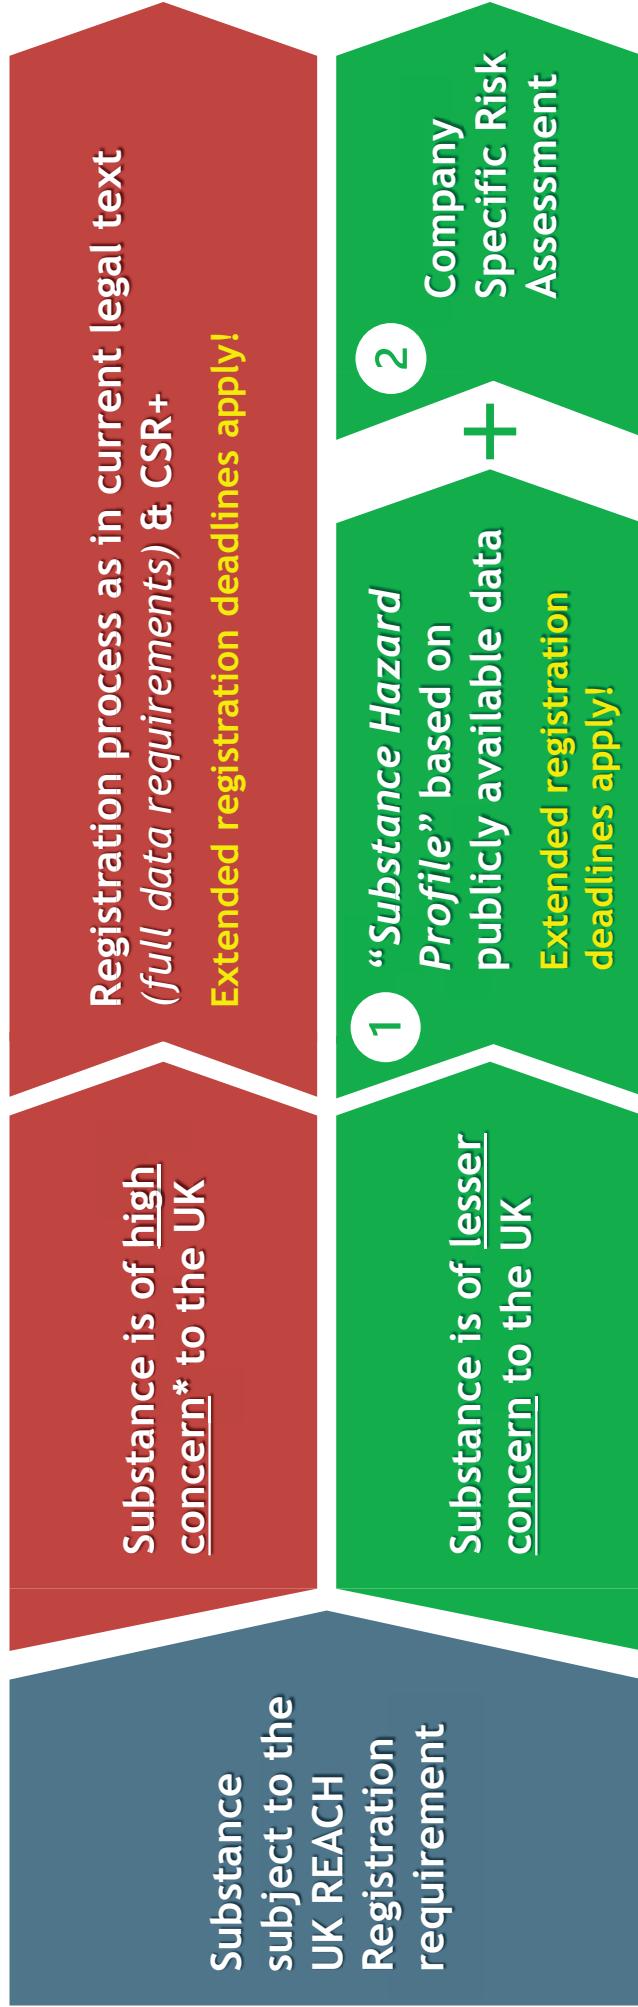

# Warning:

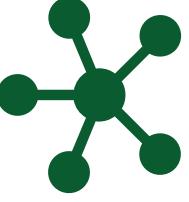

*This section is highly speculative so  
take it with a large pinch of salt...*

# New Registration Model - What We Know So Far

## The “Two Tracked” Approach

\* Substances of high concern to the UK likely to be same as SVHCs

# New Registration Model - What We Know So Far

## 1 “Substance Hazard Profile”

- Companies part of the **same Substance group** (*inquiry needed for access unless substance was Grandfathered*) need to agree on a “hazard profile” for the substance.
- The “**Substance Hazard Profile**” (“SHP”) should demonstrate that the substance properties have been assessed by the registrants
- The SHP should be populated with “**publicly available data**” (*without IPR issues...*) and **data held within the substance group**
- The SHP will be **compiled in IUCLID** (UK specific template may become available)
- SHP work will headed by the “**Lead Registrant**” as elected by companies of the substance group and **is submitted Jointly as part of the Joint Submission**
- The SHP is **submitted to the HSE** as a IUCLID dossier via the “**Comply with UK REACH**” IT system
- HSE Registration fees would apply

## New Registration Model - What We Know So Far

### 2 Company “Specific Risk Assessment”

- Companies submitting the “**Substance Hazard Profile**” (*any registration?*) would also provide a **registrant / Company “Specific Risk Assessment** (“specific CSR”) focusing on the **GB use and exposure of the substance**.
    - The information should be useful in a GB context and not “as broad / generic” as the equivalent EU Chemical Safety Report (CSR)
    - May also apply to 1 - 10 t/a substances ... ?
  - More **registrant specific data** should be included (*compared with EU REACH CSR’s*):
    - Data on tonnage per use
    - Number of sites used at (*more details of the supply chain*)
    - Evidence of GB specific data and exposure supporting the risk assessment
    - Disposal, waste and recycling information ...etc.
  - Registrants could submit a **confidential and non-confidential version** of the specific CSR, one that is “*publicly available*” in the supply chain the other not (?)
  - Prepared and submitted individually by **each registrant to the HSE** (?) but could be based on common template of the Joint Submission (?)
- REACH→LAW**

*Companies would only need to provide  
full data sets for chemicals “deemed to  
be of most concern to the UK”*

*Defra Recommends inquiring early  
(according to UK REACH Art.26) in order to be  
able to follow what is going on in the  
substance groups and participate in the  
discussion on data sharing and more  
regardless of the registration model*

# Turkey KKDIK

# Turkey REACH: Current status

- **Competent Authority:** Ministry of Environment, Urbanisation and Climate Change (MoEUCC)
- **Importers information:** add to the registration dossiers
- **The Chemical Safety Assessment and Reporting System (KGDRS),** which allows the Chemical Safety Report to be prepared through the data entered in the KKS, has been integrated into the KKS and ready to be used.

# KKDIK Registration - An Overview

## The KKDIK Registration Basics

Registration Threshold = 1 t/a

- All in Turkey manufactured or into Turkey imported substances as such or as part of mixtures at 1 t/a or more must be KKDIK registered by 31st of December 2023
  - Registration window for all substances from 1 t/a: **1st of January 2021 → 31st of December 2023**
- Registration tonnage bands: (*Same as EU REACH*)
  - ≥1 - <10
  - ≥10 - <100
  - ≥100 - <1 000
  - ≥1 000 t/a
- Registration types: (*Same as EU REACH*)
  1. Full substance
  2. On-Site Isolated Intermediate > Strictly Controlled Conditions (“SCC”) must apply!
  3. Transported isolated intermediate > SCC must apply in the whole supply chain!
- Submissions in Turkish language using the **KKS System**

REACH→LAW

# KKDIK Registration - An Overview

## Information Requirements

Tonnage band	Annex 7	Annex 8	Annex 9	Annex 10
1-10 t/a	●			
10-100 t/a	●	●		
100-1000 t/a	●	●	●	
≥ 1000	●	●	●	●

Annexes of the KKDIK regulation listing data requirements

+ including a:  
**Chemical Safety Report**

When there is an information gap that cannot be filled by any existing data (non-testing method), the Lead Registrant will need to:

- For data according to **Annexes 7 or 8 → Generate new information**
- For data according to **Annexes 9 or 10 → Prepare a testing proposal**
- Annex 11 provides general rules to adapt information requirements

**Not applicable to intermediates under strictly controlled conditions**

# KKDIK Registration - An Overview

## Joint Submission Concept

- When a substance is intended to be **KKDIK registered** by one or more companies, a **Joint Submission** of “core registration data” is required
  - Individual submission seems not to be possible (will implement OSOR principle as in the EU)
  - Opt-Out's are possible

**Lead Registrant**  
*One company only*

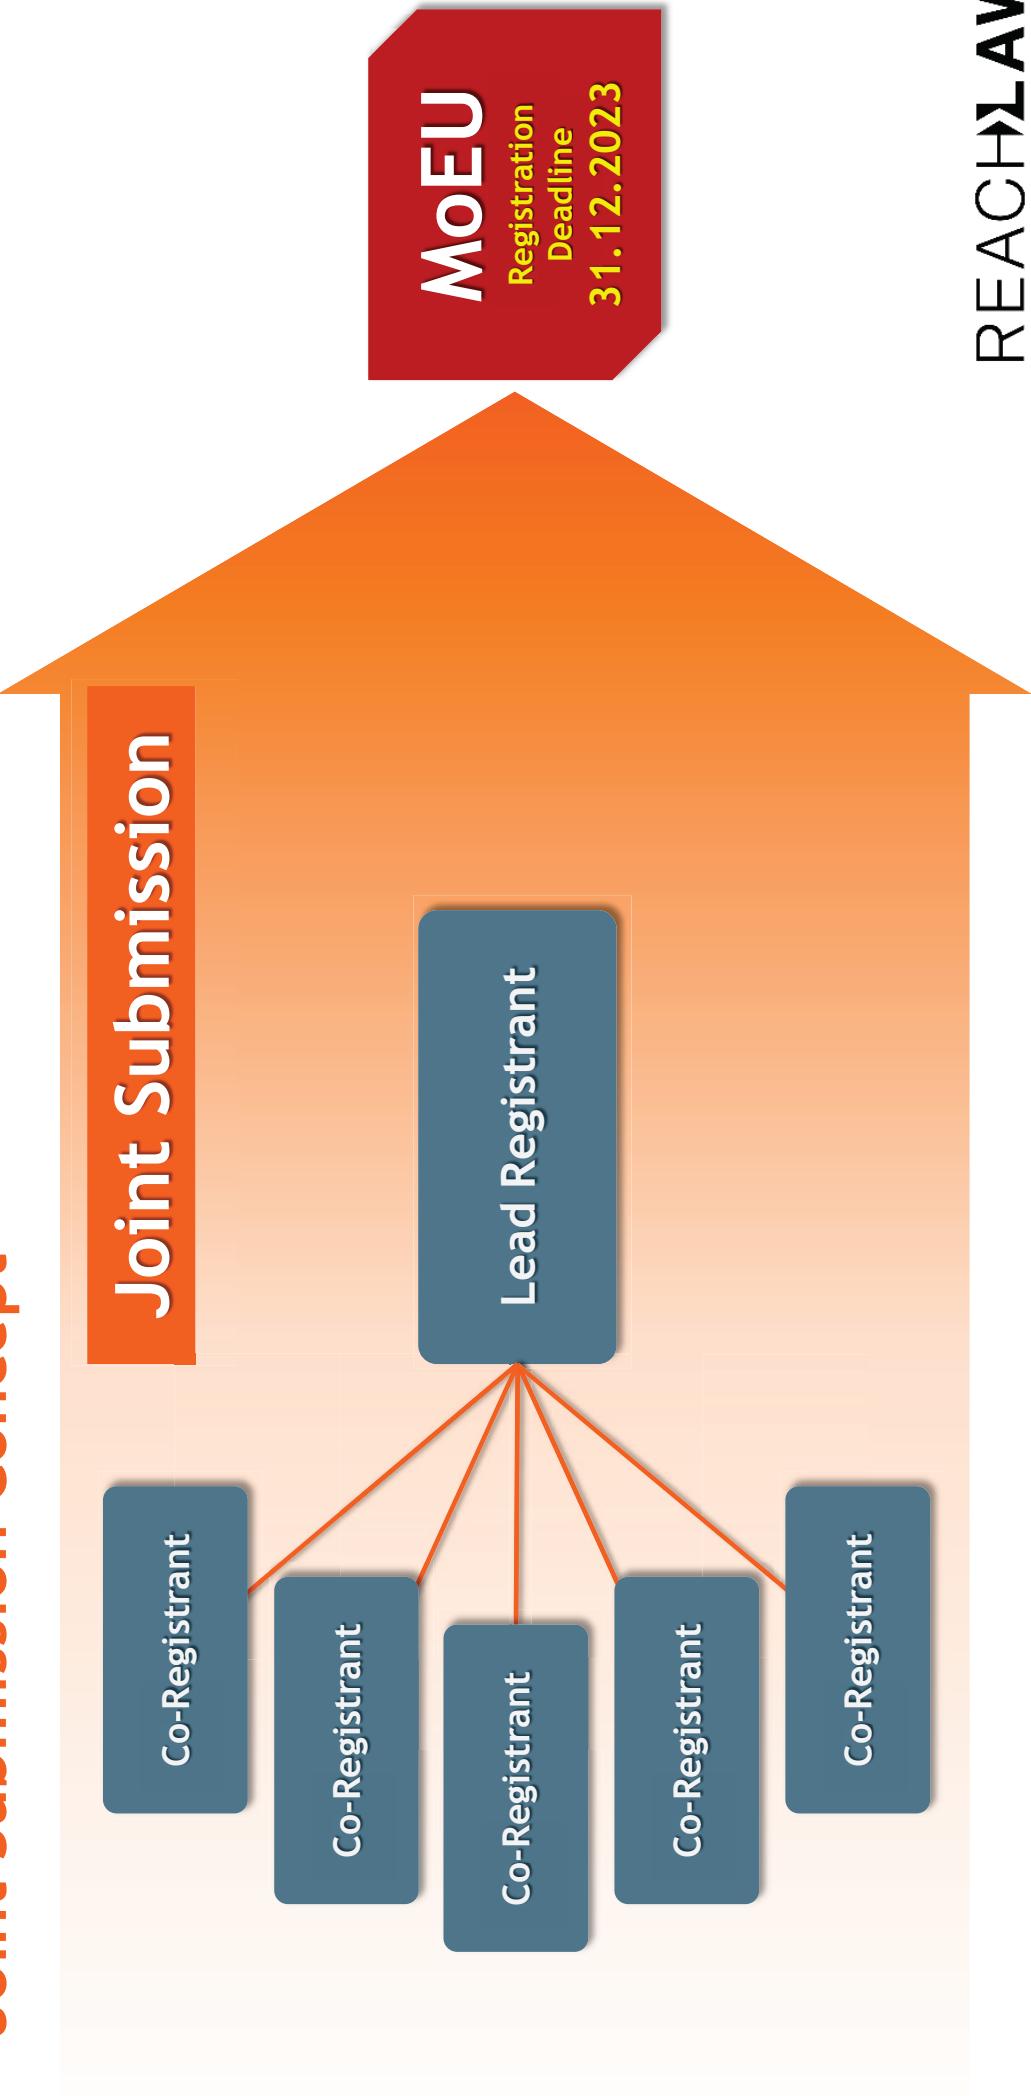

**Co-Registrant(s)**  
*0 to many companies*

These form the **Substance Information Exchange Forums** (“SIEF”) where data needs to be shared in a **“fair, transparent and non-discriminatory way”** (as with EU REACH) eventually becoming a **Joint Submission** upon submission of the registration to the MoEU

- *Defined in KKDIK Articles 12, 23 and 26*

# KKDIK Registration - An Overview

## Joint Submission Concept

**Joint Submission is Mandatory**

*Individual submissions will not be possible  
without special permission*

## **KKDIK Registration - An Overview**

### **MoEUCC KKDIK Registration Fees**

- MOEUCC fee (Authority fee) for registration has been increased by the authority on January 17, 2023 :

		<b>MoEUCC Fee / substance (Updated)</b>	<b>MoEUCC Fee / substance (old)</b>
Tonnage band (t/a)	Individual Submission	Joint Submission	Individual Submission
1-10	2 200 TL (110€)	1 660 TL ( 83 €)	1200 TL (59 €)
10-100	5 500 TL (275 €)	3 880 TL (194 €)	3000 TL (147 €)
100-1000	15 500 TL (775 €)	11 100 TL (555 €)	8400 TL (412 €)
>1000	33 300 TL (1 665 €)	26 600 TL (1 330 €)	18000 TL (882 €)

MOEUCC website: <https://kimyasallar.csb.gov.tr/taslak-kkdk-uretleri/333>

# From PRE-SIEF to Joint Submission

## Pre-SIEF (Substance Information Exchange Forum)

- By KKDIIK pre-registering a substance, you have **become a member of the Pre-SIEF for that substance**
- Pre-SIEFs allows for early collaboration in preparing for the **Joint Registration** together with other companies that have **pre-registered the same substance**
- Functionality is provided in the **KKS system**

# From PRE-SIEF to Joint Submission Pre-SIEF in the KKS System → Contact Information

Example view of the “**“Acetone”**” (EC#: 200-662-2, CAS#: 67-64-1) Pre-SIEF in KKS system.  
You can see what company has pre-registered this substance and you can also see their full contact details.  
Information can be exported to an EXCEL file for easy management.

Son Sayfa

Excel'e Aktar

## From PRE-SIEF to Joint Submission Lead Registrant Selection / Election

(Page 1/2)

- In the Pre-SIEF (*can also be done later in the SIEF*), you should **select a Lead Registrant to take the Joint Registration development work forward**
  - Typically, companies wishing to become the Lead Registrant, expresses their interest to do so in the Pre-SIEF, usually by email
- If there are **two (2) or more Lead Registrant candidates**, a **Lead Registration election** needs to be carried out
  - There is **no formal authority for this** → Pre-SIEF members need to **self-organise this**
  - Typically the Lead Registrant candidates will ask for support to become the Lead Registrant and give e.g. **2 weeks time to cast a vote of support** (by email)
    - **If you do not vote, you cannot affect who becomes the lead registrant**
  - The Lead Registrant is elected by a **simple majority** vote

## From PRE-SIEF to Joint Submission Lead Registrant Selection / Election

(Page 2/2)

- A “**good**” Lead Registrant is typically a company that is *data rich* and/or has the *highest annual volume* and/or is the *EU REACH Lead Registrant* for the same substance and is a “*serious player*” on the market for the substance.
- An **Only Representative** can also become the Lead Registrant
- Sometimes, **industry associations / EU REACH Consortia / other Consortia** may take the lead in the development of the joint registration and the Lead Registrant selection may be postponed to later

If there is NO Lead Registrant, there is NO Registration

# Co-Registration - An Overview

## What is a Co-Registrant?

- The **Co-Registrant** is responsible for its own registration:
  1. Cooperate in the (Pre-)SIEF
  2. Agree on substance identity (*verify that the substance truly is the same as your substance*)
  3. Share data (*if available*) - You may own data for EU REACH purposes?  
4. Share costs (*e.g. purchase a “**Letter of Access**”*)
  5. Compile and submit the Co-Registration **as part of the Joint Submission** and submit the dossier to the MoEU using KKS before the registration **deadline of 31.12.2023**
  6. Keep the Co-Registration dossier up-to-date
  7. Record keeping and communicate with authorities

Pre-Submission

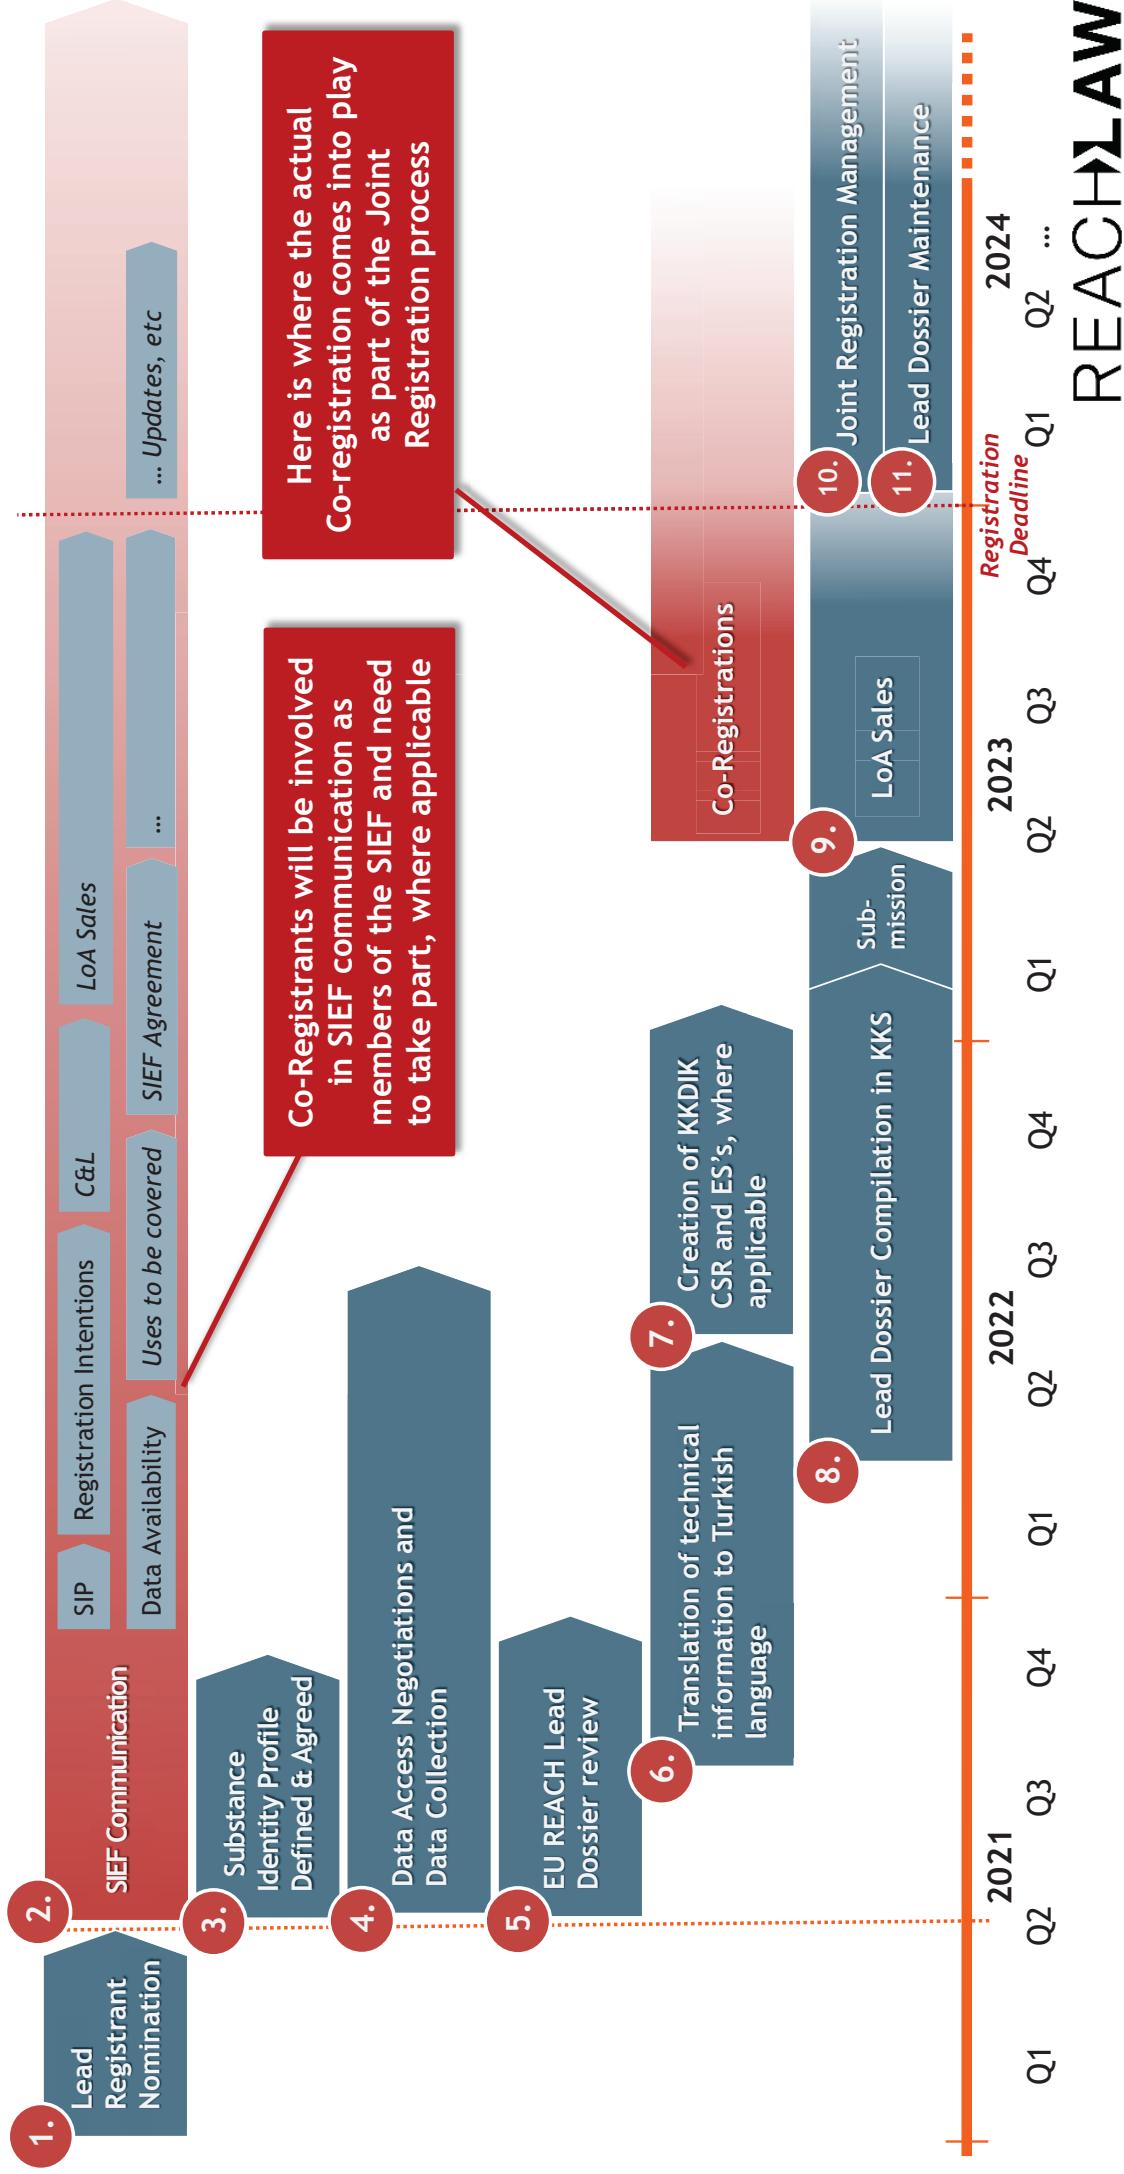

Post-Submission

## Co-Registration - An Overview

### What does the Co-Registrant Dossier Contain?

# Co-Registration - An Overview | KKDIK Lead Registration Process

# Access to the Joint Submission **LoA Process**

Closer to the completion of the Joint registration and when all costs are known (*sometimes only after the LR dossier submission*), the Lead Registrant / Consortium will issue a LoA

The Co-Registrant should then check the LoA and pay the applicable fee related to its Co-registration:

- Type of registration
- Tonnage band, etc.

Lead Registrant will provide access to the Joint Submission  
The Co-registrants has to join the Joint Submission in KKS

Submit your Co-registration as part of the Joint Submission  
+  
Pay the MoEU registration fee

Do this as soon as possible when the LoA is available

Latest 6 months before 31.12.2023 (Registration deadline)

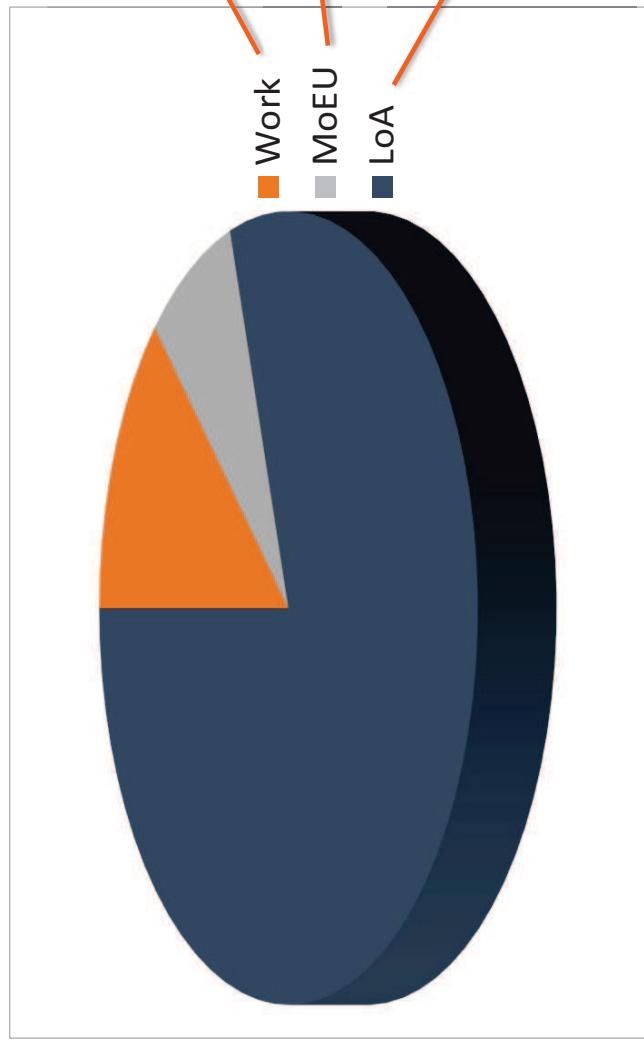

Do this well before the registration deadline  
31.12.2023

**You only have to pay for data that you actually need for your registration. You do not have to pay for data you already have (own) to fulfil your data requirements for your registration and tonnage band.**

*“Fair, Transparent and Non-Discriminatory”*

## Cost of Co-Registration

### Rough Estimate of KKDIK Co-Registration Cost Distributions

#### Work:

Internal resources  
Service provider costs

#### MoEU fixed fees:

Depends on company size and Type of registration (tonnage band, joint submission or individual submission, full or intermediate registration)

#### Letter of Access fee:

Data costs and Lead  
Registration work costs

It is expected that the LoA will be the most expensive component of the KKDIK Co-Registration

\$7 000-\$10 000

# Conditions of license

The holder of licence or certificate of conformity shall,

- upon expiry (if not renewed), suspension or cancellation, discontinue its use & withdraw all promotional material;
- return the licence document to the Bureau in the event of licence being surrendered, suspended or cancelled;
- inform the Bureau of any changes in management or address of the firm or conditions which were declared earlier;
- implement changes w.r.t. amendment to Indian Standard or revised Indian Standard, upon issue of amendment or revision within the stipulated time as specified by the Bureau;
- inform the Bureau in writing of discontinuance of operations exceeding three months.

Maintain records as specified by the Bureau from time to time.

The liability of the holder of licence or certificate of conformity, incase complaints about non-conforming system are established, shall be as provided in the Act and rules made thereunder.

The Bureau shall have the right to amend the conformity assessment scheme or any of the conditions by giving 1 month notice

The conformity assessment activities relating to grant and operation of licence or certificate of conformity may be carried out or witnessed by the auditors authorised by the Bureau in this regard during an audit as per the requirements of conformity assessment schemes.

The Bureau may suspend the licence or certificate of conformity based on evidence of nonconformance to the specified requirements or conditions or non-payment of dues.

Any violation of conditions of the licence or certificate of conformity may lead to cancellation of licence or certificate of conformity.

# Conclusions

## EU REACH

- Information requirements for registering chemicals under REACH
- OR obligation: to provide details on the non-EU manufacturer they represent in REACH-IT
- Evaluation: Decision after receipt of Draft Decision
- Dossier update
- REACH Revision & Enforcement

## UK REACH

- Transitional Registration deadlines are dependent on the substance type and annual tonnages – Currently they are **27.10.2023 / 27.10.2025 / 27.10.2027 but will be somewhat postponed (To be determined by how much)**

- The Registration process is also in flux as a new registration approach is under discussion

## Turkey REACH

- No official extension on registration deadline → **31.12.2023**
- **Act now** → Register few substances in 2022 to ensure all substances are registered by 2023

## India BIS

- Mandatory (QCO) proposed for 76 Chemicals
- 9000 Indian Standards for Chemicals to be developed
- Quality Control Orders for 782 existing Indian Standards for Chemicals to be decided in two phase
